Greetings All,
As we approach the end of 2018, I wanted to give you an update on the current status of the WTP Design Manual, 6th Edition. Unfortunately, at this time AWWA is still at an impasse with McGraw-Hill over terms of the publishing agreement which has put this book on hold. Please see the email below from Tony Petrites of AWWA Publications updating us on the current effort by AWWA and ASCE to explore other options.

Our last steering committee conference call was held on March 14, 2018, and we met with AWWA publishing at ACE in June 2018. We have since suspended further steering committee calls until we have assurance that AWWA has a publishing deal, or has identified an alternative path forward. We are asking authors and coauthors to refrain from working on their chapter updates until these issues are resolved. We will keep you informed so that you can schedule your workloads well in advance once we have direction from AWWA.

Thank you all for your contributions to the planning of this manual to date and your patience waiting for a publishing agreement. We hope to secure a publishing deal and get this project restarted in 1st quarter 2019.

Wishing you all Happy Holidays!

Doug

Subject: RE: WTP Manual

Hi Doug,

Here's what I have as an update:

We've been speaking with ASCE about next steps to take. McGraw-Hill has acceded to some of our requests, but not the major one (that AWWA and ASCE retain copyright of the book). The publishing staff at ASCE are meeting with their EWRI division and volunteers in the new year, so we should have some more information to reach a decision after that.

Merry Christmas and happy holidays to you and your family! Take care,

Tony

Hey Tony,
Anything new on the manual?

Thanks
